

March 23, 1976

other type of word that you would like to use in a more negative fashion. However, we are where we are, and if you will look at your agenda you will see that we have twelve bills, and they are all appropriation bills, that is all that is listed for today. But, I can assure you that I will find some other legislation to propose if we happen to finish this up relatively early this afternoon. I would like to stay in session until approximately 6:00 this evening. For tomorrow if we do finish up the appropriation bills which are on our agenda, I would like to then for the first order of business tomorrow morning pick out three A bills that are on General File at this time and one that was submitted yesterday evening about quarter till five to the bill drafter. So, there would be four A bills that we either vote up or down and make some disposition of the other four bills that are either on Final Reading, they are all three on Final Reading, one is on Select File which I don't think that Senator Stull and I wish to pursue which is LB202, which was supposed to have been unbracketed this morning. I believe that it could stay bracketed as far as we are concerned, it is too late in the session to pursue it at this time. After we finish those A bills tomorrow I'm not going to tell you that it will be in this order, but it will be on your agenda tomorrow, we can say that if we do not have a tremendous lot of amendments on this legislation we would either vote it up or down. One of them is LB821, the Clean Drinking Act, the Clean Water Drinking Act. LB986 which has to do with the allocation of space here in the building after the other offices move out of the building next fall, and then it will be set out and spelled out by Senator Savage as to where the space is for the members of the Legislature and what will be used by the Clerk and the members of the Legislature. Then we have another....these are as I classify them as state wide general interest. LB779 has to do with the Loup and the Niobrara Rivers and the Game Commission's park that they are in. Then we will have 863, the gas tax bill. We will also have the election laws, conflict of interest or whatever is in LB987. That will also be discussed, hopefully tomorrow. We will also have the pesticide bill. The pesticide bill has had much study on it. It is done and redone and maybe there are some changes on the floor yet. But, it will give us an opportunity to discuss LB332, the pesticide bill. I believe that that is possibly all that we will have time for, but I must point out to you that we have a few other bills that were set for a priority date certain on general file. One of them is 464 the lottery bill. One is LB631 the state aid bill. Then there is a 565, I believe that it has to do with the sanitary land fills, and there is 388, a Constitutional Amendment. I don't know what it refers to, I'm sorry. Also a bill 590, I think it has something to do with insurance. But, this last group of bills have been set for a date certain and because of the other priorities whether it be budget or 434 or whatever, they were set back. So, I'm sure that that is all that we can possibly accomplish tomorrow or maybe even more than we can accomplish. But, I'll tell you this. We can extend the day one more session on General File. I visited with Emory Burnett this morning and he is hopeful that he can get these accomplished unless there is an excessive amount of amendments, which would make it impossible for him to do this. One of the other items that I would like to mention, even though we are running short of time, it does create a tremendous
